

YOU ARE
INVITED

In-Person Meeting:

**February 17, 2026
from 5:00-8:00pm**

**Westville Town Hall
4326 State Route 37
Malone, NY 12953**

Boralex invites you to an in-person Open House for the Little Salmon Solar Project

The Little Salmon Solar Project is a proposed 200 MW solar facility being developed by Little Salmon Solar LLC, a wholly owned subsidiary of Boralex Inc., in the Towns of Westville and Fort Covington. At this open house, Boralex will provide information on the current project area, results from field studies, and discuss our intention to submit an application to the Office of Renewable Energy Siting and Electric Transmission (ORES). We encourage all interested parties to attend the Open House to learn more about the project. Boralex is committed to becoming a long-term partner with the Towns of Westville and Fort Covington. Our goal is to develop the Little Salmon Solar facility in a manner that respects the wishes of, and delivers benefits to, the local community.

The event will be an open house format, consisting of poster boards that will describe the project and Boralex staff in attendance to answer questions. The event will be held Tuesday, February 17, 2026 from 5:00-8:00pm, at the Westville Town Hall at 4326 State Route 37 Malone, NY 12953. *If either the Salmon River Central School District or Malone Central School District are closed for a snow day on February 17, the Open House will be rescheduled for the Snow Date of Thursday, February 19 from 5:00-8:00pm at the Westville Town Hall.*

BORALEX

Project Location

The Little Salmon Solar project will be located in the Towns of Westville and Fort Covington, Franklin County, NY.

At this time, solar panel arrays will only be placed within the Town of Westville, the Point of Interconnection (substation) is located in the Town of Fort Covington.

Project Benefits

The Project will offer significant economic, social, and environmental benefits to the Towns of Westville and Fort Covington, the local School Districts, Franklin County, and New York State (NYS) including:

- Creating approximately 150 jobs during construction;
- Creating long-term jobs to support operations and maintenance;
- Boosting local economy and adding commerce for local businesses during construction and operations;
- Providing significant revenues to the Towns of Westville and Fort Covington, Franklin County and to the Salmon River and Malone Central School Districts;
- Providing quiet, emission free and reliable power generation for tens of thousands of NYS households.

Contact Information:
